Secret Messages Answers for Geography

Pg 171

Westerly winds are called this because of the direction from whence the wind comes from

Pg 172

The higher you travel into the atmosphere, the more noticeable the westerly winds are

Pg 173

At the core of the westerly winds lies what scientists call a jet stream

Pg 174

Each hemisphere's westerly has two main jet streams

Pg 175

Closer to the poles you find the polar jet stream

Pg 176

At a lower latitude you find the subtropical jet stream

Pg 177

Located above each of the poles we find a semi permanent low pressure

Pg 178

During the day, land gets heated by the Sun much quicker than does water

Pg 179

At night land cools down much quicker than does the waters of the ocean
